Tactical Provisioning
- HMS FIM Bridge
- SEAS FIM Bridge
- Backout HMS
Bridge
- Backout SEAS
Bridge

Core Provisioning
- SailPoint Infrastructure Build (Foundation)
  - ID Service/UUID
  - O365 Provisioning
  - SailPoint Self-Service UI, including Claim Account, Sponsored Accounts, Password Mgmt, etc.
- Pilot Implementation of Google and Office365 Sync

Office 365
- governance Model
  - Provisioning Reqs.
- HMS Setup and Migration
  - SEAS Setup and Migration
- HLS Setup and Migration
  - HKS Setup and Migration
  - HBS Setup and Migration
- FAS/Central
  - Requirements
  - Data
  - Implementation
  - Migrate

School Specific Provisioning
Each school would follow the same high-level steps:
- Requirements. Document local provisioning and process requirements.
- Data. Bring in local data into central solution.
- Implementation. Implement defined requirements into SailPoint.
- Migrate. Migrate local users into SailPoint and switch local support process.

Benefits
Office 365
- Simplified account management
- Reduction of duplicate accounts
- Local credentials with PIN
- Local credential with InCommon
- Preposition to use future shared services, e.g. SalesForce

Google
- Resource funded by Collaboration Initiative

Work performed by:
- UC/Infrastructure
- IAM
- Resource funded by Collaboration Initiative
- Combined effort by IAM and School

Key:
- Co-dependent, migration work needs to be coordinated
- Share prerequisite on core provisioning
- Milestone enabling O365 access with related work
